HOW TO CREATE A QUIZ

I.   WRITE THE QUESTIONS
    A. Choose a topic
       1. Science
       2. Math
       3. History
    B. Search for relevant information to be put as question
    C. Offer answer options which are related to the provided topic and information

II.   PRESENT THE QUESTIONS
    A. Put all the questions in a list of available questions
    B. Pick a random question from the list
    C. Sort its options in a random order
    D. Show which option has been selected by the user
    E. Give to the user the chance of selecting any other option before submitting the answer
    F. After the answer has been submitted, show the correct answer compared to the selected option
       1. Highlight the correct answer in green
       2. Highlight the selected option in red, if it doesn't correspond to the solution
    G. Remove the question from the list of available questions
    H. If there are any other available questions, pick the next one randomly

III.   SHOW THE SCORE
    A. Show the percentage of how many questions have been answered correctly
    B. Show the number of questions answered correctly
    C. Give to the user the possibility of playing the quiz again
